PROJECTS

Stubbies   Live GitHub

- Social media application built in **React** with **Redux**, **JSX, CSS, and Node** to provide users with the ability to create events and join study group
- Collaborated with back-end developers to create **Axios** request to render the necessary user data
- Control user access and content through the implementation of facebook login for user authentication
- Integrated google maps API pinpoints all event locations and details
- **Mobile responsive** using **Media Queries**

Fridge Bridge   Live GitHub

- Food and drink recipe application created in **HTML** and **CSS** that provides recipe suggestions as well as a youtube video based on user ingredient search input
- Utilized **JavaScript** and **jQuery** to create **AJAX** request to Yummly, CocktailDB, and Youtube APIs.
- Dynamic **DOM** manipulation using **jQuery**
- **Mobile responsive** using **Bootstrap 3**

Match Royale   Live GitHub

- Clash Royale themed memory match game built in **JavaScript** using **Object-Oriented Programming** paradigm
- Styled using **CSS flexbox** layout
- Incorporated **CSS animations** to animate start of game and card flip
- **Mobile responsive** through the use of **Media Queries**
